DETAILED ACTION

Drawings

An Official Draftsman has approved the drawings.

Objection to the Disclosure

37 CFR 1.163

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

In plant application filed under 35 U.S.C. 161, the requirements of 35 U.S.C. 112 are limited.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164 (reproduced below) are controlling:

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

Art Unit: 1661

In plant applications filed under 35 U.S.C. 161, the requirements of 35 U.S.C. are limited. The following is a quotation of 35 U.S.C. 162:

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 37 CFR 1.163(a) because the specification presents less than a full and complete botanical description and the characteristics which distinguish over related known varieties.

More specifically:

- A. Applicant should italicize the botanical name of the observed plant, as this is the convention employed by the International Code of Nomenclature.
- B. At paragraphs [0001] and [0009], the recitation "*interspecific cross*" is not the specific epithet or species name of the claimed plant. If the species name is unknown, then the abbreviation of specie -- sp. -- or -- hybrida -- after the genus should be imported into the specification.
- C. At paragraphs [0003], [0080] and Table 1, Applicant describes the cultivar Lemon Symphony as U. S. Plant Patent No. 13,385; however, the name on the plant patent is 'Seidacre'. After further research of 'Seidacre' through the Internet, the trade name of 'Seidacre' is 'Cream Symphony'. The trade name of 'Lemon Symphony' is 'Seikilrem' (U.S. Plant Patent No. 13,407). See Elsner pac Jungpflanzen GbR. Clarification and correction are necessary.

Art Unit: 1661

D. At paragraph [0004], regarding the brief description of the photograph does not correspond with Figures 1 and 2. Figure 1 shows a close-up view of three inflorescences and not of a single inflorescence as stated. With reference to Figure 2, the attached photograph appears to show a top view of a 'Kakegawa AU12' plant including its foliage, flower buds and opened blooms. Corrections are necessary.

E. Applicant should disclose in the specification that the claimed cultivar is stable and reproduced true to type in successive generations of asexual reproduction.

F. The claim must be drawn to entire "plant". Applicants should insert the word – plant – after "Osteospermum". Correction is required.

The above listing may not be complete. Applicants should carefully compare the claimed plant with the botanical descriptions set forth in the specification to ensure completeness and accuracy and to distinguish the plant within this expanding market class. Any further botanical information should be imported into the specification, as should any additional or corrected information relative to same.

Claim Rejection

35 USC § 112, 1st and 2nd Paragraphs

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for reasons set forth in the Objection to the Disclosure Section above.
